review-skill

revise-skill

Name: va-paper-extraction

Description: extract, review, and revise structured knowledge from VA system papers.

Domain guidance

- Read interface figures together with text to understand system functionality.
- Use system descriptions to interpret actions reported in case studies.
- Group analytical actions by their goals, not individual clicks.

Quality control

- Attach supporting passage or figure references to extracted content.
- Check extracted records against the paper, not just for internal consistency.
- Validate output structure and cross-layer references after revision.
